just got a lot easier

sex sling™:

Features:

- Allows you to elevate your legs without leg and back fatigue
- Holds legs in place – leaves the hands free
- Deeper penetration
- Intense G-spot action

The Sex Sling allows the wearer, while on their back, to comfortably raise their legs and tilt their hips. If a woman is wearing this, she will experience deeper penetration, more direct G-spot contact and stimulation, and reduced leg and back fatigue. This product is also ideal for oral sex, as it allows the wearer to get their legs up in the air for easier access.

The wearer can easily adjust the tension and thus how high their legs are raised with straps that attach to the padded ankle cuffs. Easy plastic adjusters can be raised for quick release of the legs as well.
